Introducing MDLIVE E-Treatment.

Making virtual urgent care even easier
and more convenient.

You can now access virtual urgent care your way and on your own time. E-Treatment is available for non-emergency illnesses and injuries – including many common, everyday conditions – without the need to interact live with an MDLIVE® doctor.¹

How does E-Treatment work?

E-Treatment gives you access to the same board-certified doctors with the same quality care you've come to expect from MDLIVE. You simply provide information about your medical history and current condition through a dynamic online questionnaire in the MDLIVE patient portal. The treating doctor will review the information you submitted and quickly deliver a diagnosis and treatment plan, including sending any necessary prescriptions³ to the pharmacy of your choice. You'll be notified through email or text when your visit summary is ready.

When should you use MDLIVE E-Treatment?

E-Treatment is a great option for common, everyday conditions when you don't want – or have time – to talk live with a doctor, or if you don't feel well enough to jump on a call or video chat. You can use MDLIVE E-treatment for conditions such as cold, flu, sinusitis, sore throat, ear pain, pink eye, UTI,² and more. Regardless of your condition, you can always make an appointment to connect live with an MDLIVE Urgent Care doctor by phone or video chat.

NOTE: MDLIVE E-Treatment does not provide emergency health services. If you're experiencing an emergency, call 911 or go to your nearest Emergency Room.

How to access MDLIVE E-Treatment

You can access E-Treatment by following these steps:

- Log into **myCigna.com**® or on the **myCigna**® App and select Talk to a Doctor to access the MDLIVE patient portal.⁴
- Select Get Started with Urgent Care on the MDLIVE homepage.
- Select E-Treatment from the options presented.
- Follow the prompts to complete your questionnaire, which will be sent to the treating doctor.

Why you should try MDLIVE virtual urgent care
